

Fr. David Hewko – First Saturday (Partial) – May 5th, 2018

@ about 31 min:

You can't play games with these beasts of hell, these modernists. That's what's happening and it's very grave, very sad what's happening with the SSPX. Which we continue to claim the new conciliar one. Well, they have a priest now promoting evolution and the big bang theory. Can you believe that? I never thought I'd see it this quick.

It's happening right before our eyes and his book is being promoted by the SSPX and he's being called a realist. Saying that we can believe that all of creation came with the big bang theory which was invented by a modernist priest in the 1920's, Fr. Joseph Lemaitre from France. Then he (Fr. Robinson) also says the world "as we scientifically can prove" that the earth is 13.8 billion years. What nonsense! How is this possible?

Listen to St. Pius X when he condemns these modernists. This is taken from *Lamentabili*. Here's what he says about Fr. Paul Robinson's statements in his book.

St. Pius X says, this is condemned those who say *the scientific progress demands that the concepts of Christian doctrine concerning God, creation (the book of Genesis) revelation, the person of the Incarnate Word and redemption have to be readjusted*. [#64]

So in other words, science says well, we can't really believe the book of Genesis. It's not 6 days of creation it's 16 billion yrs. of creation. St. Pius X condemns them. If science contradicts revelation, if science contradicts the book of Genesis, or anything in scripture, in tradition, science is wrong. Why? Because the authority of God is behind scripture and tradition. The authority of some "expert," human expert, is behind scientific progress. It's already been proven wrong. Darwin's book when it was published, it sold millions of copies in the mid 1800's. It went through several reprints. Darwin said man came from apes. Big bang theory came later (in his writings), all this nonsense about survival of the fittest. Now ask any honest scientist today, do you believe in Darwin, do you believe what he taught? He'll say no, it's ridiculous, it's obsolete. It doesn't hold. In 1986 in Chicago a whole group of American scientists pulled together and said we declare Darwin's theories obsolete. They can't be real. They're fiction.

That's how it is. In all these fictional theories of evolution the more archeology, the more, true science unburies things that the earth is actually very young. Grand Canyon didn't exist billions of years ago. It's a complete rebuttal to this billions of years ago. It was formed in a few weeks from the water draining off from the flood. And Mt. St. Helens, that was a big help to modern man because Mt. St. Helens when it blew in 1980, you've got grand canyons, miniature ones forming. You're got oil, charcoal forming within weeks from the hot pressure. It's a complete rebuttal of this billions of years nonsense. All of this happened within weeks, within months. Short time.

It proves to be over and over again the book of Genesis is always right. When modern science tries to say something else, it comes back around the book of Genesis is right.

When they discover the bones of dinosaurs and the big beasts that existed before the flood, they've got skin on them some of them, marrow in the bone. They can't be more than 5- 6 thousand years old. They're not billions of years old.

Same with all the evidence of Noah's ark and the flood. You've got crystals on top of mountains, you've got fossils in the state of panic. You've got the woolly mammoths in Siberia when the continents shifted those woolly mammoths were eating in a nice climate, eating in a jungle, eating good green grass. Suddenly with the shifting of the continents when the continents were split, when the fountains of the deep burst, as the book of Genesis says written by Moses, inspired by Almighty God, therefore more true science than any science. When the fountains of the deep burst its split the continents which

abruptly moved and the woolly mammoths that were feeding in the nice warm jungle suddenly froze to death. They're found today in ice, with the green grass still in their mouth, still in their stomach but they're frozen. It just froze them in time. These are great proofs of the flood. Great proof of the shortness from creation to now. It's only about 6 thousand years now. It's not that long.

And we have the authority of the martyrology which says in the year 5197 B.C., Adam was created from the slime of the earth.

So, we're all told these lies. When you visit these museums, and they're all pushing this non-sense and these lies of evolution. The poor kids in high school and college they're drowned in the lies of evolution. Of course, it's logical if I came from an ape, if my great, great, great grandparents were apes then I can act like one. That's what it means, there's no morality. They act like pigs and the poor souls are plunged into hell by droves.

So, St. Pius X condemned these guys. Condemned these wretched modernists and this modernism is well entrenched now into the SSPX.

Where are the priests to burn that book publicly? Where are priests to publicly condemn that book written by Fr. Robinson at his conferences? Where's Bp. Fellay to correct this priest under him and put him back in the seminary to scrub toilets and read again Pascendi, Lamentabili, the Syllabus. No, this priest is a teacher at a seminary in Australia. What kind of priests are going to come out of this? Priests who no longer believe in the book of Genesis that's for sure. And if Genesis isn't true, then Jonah and the whale can't be true, and the miracles of Christ can't be true. This is exactly what St. Pius X says: They will say that the Gospel of St. John was exaggerating the miracles of Christ. There's no stopping these modernists once they overturn the scriptures and tradition. There's no stopping them! That's why St. Pius X said the only way to handle them is the old Pius V rifle, just blow them out of the Church.

That's why he enforced the Anti-Modernist Oath.
