

Fr. David Hewko – August 2018 – Six 24 Hour Days of Creations (Partial) LA, California

One of the great errors of our time we need to address because it's an old cancer that's been infecting the Church for over a hundred years. Now it's infecting Catholic tradition, especially in particular the SSPX which has caught this infection. This cancer which is not only at the level of the leadership compromising on Vat II and the new Mass, and the new Code, but not only that, now signs of its falling, of its avalanching, of its compromising is accepting the very ideas that the Church has always condemned. One of them is evolution. So, I have to speak about that briefly.

Evolution is the whole dogma of the modern world, the whole lie that at the physical level the world just evolved from a big bang and out of the world the sun and the sun hitting the earth brought out life from the amoebas in the ocean and somehow these evolved into squids and then turtles and then alligators, then monkeys and then man. But that's only one aspect of evolution. The other is more profound and more wicked and more deceitful which is at the philosophical level and the theological level. It's at that level that most men fall and that is the whole idea that truth can change. That truth is not absolute. That truth can be adapted to scientific progress.

This has been explicitly condemned by St. Pius X in his great encyclical Pascendi and his whole syllabus that he has at the end of it condemning up to 65 errors of the modernists. The problem was, this was the clergy. This wasn't just the faithful who were falling into this it was the priests and the bishops. Now it's so infected our Church that it's at the highest parts of the Church. Pope John Paul II endorsed evolution, if you remember that, and Pope Francis also and so many bishops and priests.

And now priests of tradition. A Society of St. Pius X priest published a book favoring the whole lie of the 13 or 14.8 billion-year-old earth and the big bang theory which was an invention by a Catholic modernist priest in France, Fr. Joseph Maitre. The clergy are being infected with this poison. Most of the modern minds believe evolution. It's shoved down the throats of all, the public-school kids for the last 50 years and longer. It's a dogma in universities and colleges. If you visit any museum any archeological foundations or find any place that shows fossils, what do they always say, "15 billions-years-ago when man was a monkey. Here's pre-man and pre-cana man, and peking man". All this nonsense. It's all a fiction and a lie.

We Catholic have to stand on the truth. Because the truth alone can rescue souls from the darkness of eternal damnation and the darkness of real ignorance. Real ignorance is promoted by these evolutionists. As you know, evolution is the foundation for Communism and modernism.

Let's address some of these points which are very important to have clear.

Firstly, in the book of Genesis it's very clear. [@12:04 min point.] Six 24 Hour Days Of Creation.
